Catheter valves: frequently-asked questions

What is a catheter valve?
If you need a catheter to drain your bladder, a catheter valve may be used provided the doctors know that your bladder can hold a reasonable quantity of urine without discomfort or leakage.

The valve fits securely into the end of the catheter and can be opened to allow urine to drain out at regular intervals. The valve is more discreet and comfortable than a drainage bag, allowing your bladder to fill and empty as normally as possible when there is a catheter in place.

How do I use the valve?
The Specialist Nurse will show you how to open and close the valve to drain your bladder. She/he will also discuss how often this needs to be done. If you experience any discomfort from your bladder, you should drain the catheter at that time.

What should I do with the valve?
First, wash you’re your hands thoroughly.

Position the valve over the toilet or receptacle, open the valve and allow the catheter to drain to completion. Wipe the valve with clean tissue and replace it inside your underclothes.
Now, wash your hands again

If you do not wear close-fitting garments, your catheter should be supported by a strap on the leg about which the Specialist Nurse will give you advice.

Do not allow the catheter to hang down unsupported since this will cause discomfort.

If you drain the urine into a receptacle at home, the receptacle should be washed in warm, soapy water after use and stored upside down.

Remember

- The valve is only for your catheter and should not be used by anyone else
- Try to drink at least 8 pints of fluid per day
- Avoid constipation by eating fresh fruit and vegetables in your diet

Who can I contact for more help or information?

Oncology Nurses

- Uro-Oncology Nurse Specialist
  01223 586748
- Bladder cancer Nurse Practitioner (haematuria, chemotherapy & BCG)
  01223 274608
- Prostate cancer Nurse Practitioner
  01223 274608

Non-Oncology Nurses

- Urology Nurse Practitioner (incontinence, urodynamics, catheter patients)
  01223 274608 or 586748

Patient Advice & Liaison Centre (PALS)

- Telephone
  +44 (0)1223 216756 or 257257
  +44 (0)1223 274432 or 274431
- PatientLine
  *801 (from patient bedside telephones only)
- E mail
  pals@addenbrookes.nhs.uk
- Mail
  PALS, Box No 53
  Addenbrooke's Hospital
  Hills Road, Cambridge, CB2 2QQ
Chaplaincy and Multi-Faith Community
- Telephone +44 (0)1223 217769
- E mail derek.fraser@addenbrookes.nhs.uk
- Mail The Chaplaincy, Box No 105
  Addenbrooke's Hospital
  Hills Road, Cambridge, CB2 2QQ

MINICOM System ("type" system for the hard of hearing)
- Telephone +44 (0)1223 274604

Access Office (travel, parking & security information)
- Telephone +44 (0)1223 586969

Other information
This patient information leaflet provides input from specialists, the British Association of Urological Surgeons, the Department of Health and evidence-based sources as a supplement to any advice you may already have been given by your GP. Alternative treatments can be discussed in more detail with your urologist or Specialist Nurse.
