ALL IN A DAY

HoLEP technique as a
day surgery paradigm

Cambridge Meeting
Tuesday 17th April 2012

Introduction

This is a practical course in the use of the Holmium Laser for Prostatic Disease and its use as a day surgery technique allowing you to benefit from the financial premium that day surgery carries whilst benefitting from lower costs for your department and hospital.

Your whole team is welcome.

The course is ideal for novices and those wishing to develop their experience further and will form an invaluable part of the Holmium User Group (HUG) Mentoring Program.

We encourage the principles of modular training, initiated by HUG with live demonstrations of Holmium Laser Enucleation (HoLEP) and morcellation.

Finally we will be holding the biannual meeting of the Holmium Users Group (HUG) to which all are welcome.

Slimline Fibres

VersaCut Morcellator System

Programme

Tuesday 17th April 2012

- 09.00 Registration
